Professional Summary

Computer Science and Engineering student at Bangladesh University of Business & Technology (BUBT) with a strong foundation in Full Stack Web Development. Experienced in building scalable web applications, RESTful APIs, and AI-powered solutions using the MERN stack, React.js, SQL, and Docker. Seeking a Full Stack Developer Internship to contribute, learn, and grow as a software engineer.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C, C++

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs

Database: MongoDB, SQL

Tools: Git, GitHub, Docker, Postman, VS Code, Render

Projects

Medusa AI — AI-Powered Code Explanation Tool

React.js • Node.js • Express.js • Tailwind CSS • Nebius API • Helmet • Render

Full-stack web app that explains source code in 16 programming languages using the GPT-OSS-120B model via the Nebius API.

[GitHub](#) [Live Demo](#)

- Built a full-stack platform that translates code from 16 languages into clear, human-readable explanations.
- Designed a responsive React.js frontend with customizable themes and dark/light editor modes.
- Added persistent chat history with export and clear functionality.
- Secured the Express.js backend using Helmet, CORS, validation, and rate limiting.
- Deployed the app on Render with a scalable production architecture.

NutriNova — Full-Stack AI-Assisted Diet Tracker & Meal Planner

React.js • Node.js • Express.js • MongoDB • Tailwind CSS • JWT • OpenAI API • Recharts

Personalized nutrition platform combining AI meal planning, food logging, health analytics, and dietary recommendations.

[GitHub](#)

- Built a full-stack nutrition platform with meal planning, food logging, and health tracking, including diabetic user support.
- Created a meal planner generating seven-day plans using BMR, TDEE, and macronutrient calculations.
- Implemented secure authentication with JWT, bcrypt, and protected RESTful APIs.
- Designed interactive dashboards with Recharts to visualize BMI, weight, glucose, and hydration trends.
- Integrated the OpenAI API to power an AI diet assistant for nutrition guidance.

Education

Bachelor of Science in Computer Science & Engineering

Bangladesh University of Business & Technology (BUBT), Dhaka, Bangladesh

Expected Graduation: December 2026

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering
